PROJECT WORK EXPERIENCE

Scientific self discovery : (Work from office)

The Scientific Self-Discovery Tool is a web-based application developed using React that enables users to embark on a self-discovery journey. The primary goal of this project is to provide users with a structured workflow to attempt tests, obtain results, and set personal goals based on scientific principles.

It provides visualizations and reports to help users monitor their development over time and goals to enhance their personal growth.

SLEEPNAVIGATOR : (Work from office)

SleepNavigator is a comprehensive web application developed to streamline the processes involved in managing sleep-related medical appointments, tests, results and interpretation. The platform offers different user roles and privileges, including admin, patients, physicians, and sleep navigator staff, to

facilitate efficient scheduling, order e-signing, insurance verification. App have group, locations and role based filtrations
